Failure Log

Test Type	Test Name	What Was Being Testing?	Failure Description	Actions Made to Fix
Logout	Logout-06	Trying to logout after already logging out	The error output had too many spaces in it	Fixed spacing
Logout	Logout-02	A successful admin login and logout, with transaction validation	There was a typo in the transaction output	Fixed typo
Create	Create-01	Creating a user, but misspelled command name	Capitalization in the output was incorrect	Fixed capitalization
Create	Create-01 Create-02 Create-03 Create-04 Create-05 Create-06	Various creating tests	The command is not implemented yet	Implemented the command.
Create	Create-06	Trying to create a user with a name that's too long	Create command wasn't checking input length	Changed the code to validate against input length
Create	Create-07	Trying to create a user with an empty name	Create command wasn't checking wrong minimum length	Changed the minimum length checking to be correct
Create	Create-11 Create-13 Create-15 Create-17	Various creating tests	The error prompt was incorrect (said 99,999 instead of 999,999)	Fixed error prompt
Create	Create-12	Trying to create an account with negative credit	Code was broken: wasn't prompting for credit a second time (if first time was an error)	Put the credit prompting code in another loop
Create	Create-18	Successfully creating an admin account	The command worked fine, but due to how the program is implemented, the transaction wasn't written out (because it writes transactions at end of session 'logout'), and even if the transaction was, the expected transaction wouldn't include the end of session (logout) transaction	Had to add 'logout' to the input file and the appropriate terminal and transaction output to the expected output files

Sell	Sell-04	Try to sell tickets with an invalid amount	Sell command wasn't prompting for the amount of tickets, was skipping this step	Made command ask for number of tickets
Sell	Sell-01 Sell-06	Try to create event with valid length (1-25 characters inclusive)	Entering event title over 15 characters did not work; username constants were being used	Updated constants used in function
Create Logout	Create-01 Logout-01	Try to run an invalid command	Error message was not displaying, only prompt to enter another command	Implemented error message
